thank you fudamin, in my version i also have it placed..

in idebar.cpp:534

```
void Ide::MainTool(Bar& bar)
{
    Edit(bar);
    if(debugger)
        DebugMenu(bar);
    else
    if(!designer)
        bar.Separator();
    Project(bar);
    BuildMenu(bar);
    DebugMenu(bar); //new
    BrowseMenu(bar);
}
```

is the place.. but the separator doubles are kind of ugly..

mirek could do it better , i.e even place a "debug run" button, but a first shot is alright.

but the other part, rebuild main, is quite important as well, i think
