kohait00 wrote on Tue, 16 February 2010 13:16you are absolutely right, the MainTool bar is already only for that purpose, and there is no change to DebugMenu..

any idea how to fix the other "whish"?

I think "Rebuild Main package" could execute this sequence:

- 1 clean the main package
- 2 buid the main package

But maybe it would be better just to add a separate Clean+Execute?
What do you and others think?
