As you can see I didn't use GuiLock.  
Is this correct?:

```
void OracleXmlToXslConverter::ConvertXmlWorksheetToOracleXslXML(Gate3<int64, int64,  
String>& p_progress){  
    GuiLock __;  
    String v_error;  
    ConvertXmlToXsl(source_file_address, v_error, p_progress);  
    AtomicWrite(converting, 0);  
    CtrlLogText.Refresh();  
}
```

Regards, Ion Lupascu (tojocky)

the other thread?!

Mirek
