0. It was proposed some time ago that TabBar is better have space-like divider between groups.

1. A small issue. When TabBar has bottom alignment, short tabs are drawn incorrectly (at least under WinXP).

2. It should be good to have ability to switch off DnD for TabBar. Sometimes tabs are to have fixed order.

3. It will also be good to add optional Mozilla-like "+" tab in the end of TabBar (most of modern GUI tab bars have one). I realized it in latest app, and it certainly fits good in a number of situations.
