Subject: Re: Simple IPC using Sockets
Posted by tojocky on Tue, 23 Feb 2010 16:39:24 GMT

Honza,

Preview version worked only on win32. on linux did not work. I had not sufficient time for complete test and sugestion.

One good practice is google Chrome:
 http://dev.chromium.org/developers/design-documents/inter-pr ocess-communication

I will test the latest version.

Regards,
Ion Lupascu (tojocky)

dolik.rce wrote on Tue, 23 February 2010 13:57Hello all!

Thanks Ion, let me know how did it work!

Here is new version. Some little bugs were fixed and new class, IPC2, was added. This new class extends the possibilities of IPC with broadcast and client-to-client messages. The examle application was extended a bit to show new capabilities. Also user documentation is enclosed and up-to-date.

The communication is implemented using polling. Related to this, I should mention that in console mode, the package uses bazaar/Timer (thanks kohait00!) and with GUI flag it uses functions from CtrlCore.

And of course, I'm still opened to suggestions...

Best regards,
Honza
