Hello, koldo!

What about next?

- Core: fixed bugs...
- + CtrlLib: new features...
- \* CtrlCore: changes...

and keep changes sorted. For example, this order:

- 1) fixed bugs,
- 2) new features,
- 3) changes

or replace 2 and 3.

Another way:

Bugfixes:

Core: ...

CtrlLib: ...

Changes:

...

New features:

...

I like the second way. But I don't know, which of them better for svn.

Best regards,  
Anton
