Hello Mirek

Quote:I believe we should just keep it simpleYes

Quote:Maybe, leave changes without anything, mark fixes with "*" and "unimportant" (like syncing uppdev) with ".":

If you see commit messages in SVN now some texts are not right. Because of it I would put a mark to all messages. If a message text has not a mark, dolik.rce technology would refuse it.

All other rules are good for me. If dolik.rce could enforce them at much as possible it would be perfect.
