mdelfede wrote on Tue, 23 February 2010 05:35It would be interesting to have Value type xmlized.... I've done some small parts on my own because I needed it, but it's only for some basic types, and it's too quick-and-dirty to post here

Btw, my polymorphic xmlizer could be a nice addition too... it's in Bazaar and I think it's quite functional now.

Ciao

Max

BTW, why do you create specific Xmlizes for CtrlLib types, IMO it should be possible to have just single generic one? (GetData/SetData).

(Only asking to be sure I have not missed anything
