mdelfede wrote on Sat, 27 February 2010 17:51Well, mostly because I needed some processing on ctrls loading.
My xmlizers were mostly aimed to solve a concrete problem, they are not generic ones.
BTW, I think it would be good to incorporate xmlize into ctrl, and to add OnLoad / OnStore handlers, I guess it could solve most streaming issues.

Ciao

Max

That would mean all XML stuff gets always linked in. Something I am not really happy about...
