koldo wrote on Mon, 01 March 2010 07:07 Thank you Mirek

Changing StdFont() with Arial(16) I have got the desired font size .

However is it possible to use SetZoom instead of changing font size ?.

Now it seems like SetZoom() and ViewBorder() fight between themselves.

No, I believe it is SetPage and SetZoom that fight

My SetPage variant sets the width so that one font pixel is equal to one screen pixel.

Mire
