Subject: Re: Strange memory problem in QTF RichView Posted by mirek on Wed, 03 Mar 2010 06:40:17 GMT View Forum Message <> Reply to Message

Thanks, fixed.

Your QTF is ill formed - ends with '{{', which is start of table and should be followed at least by space, but the problem was that parsing code fetched terminating zero, correctly decided there should not be any terminating zero at that point, but then while reporting the error attemted to read text past this terminating zero (which lead to "Free" usually and to crash sometimes).

So it was basically bug in bug reporting.
