
Subject: [FIXED] - Crash on today compiled ide

I got a segmentation fault on today's compiled theide.
Codes segmentates in X11 library, just on a XftFontMatch() call inside CreateXftFont(),
DrawTextX11.cpp line 40.
Adding this just before that line :

```
if(!Xdisplay)  
    return NULL;
```

Allows theide to run.
I guess it's some initializer that runs before Xdisplay is set.

Ciao

Max
