
Subject: Format(Time time, bool seconds) problem

Hello all

Now Format(Time) removes hour and minute when hour == minute == second == 0.

This affects too to EditTime control.

Would it be possible to remove this behavior or at least to add some parameter to avoid it ?

I am forced to have full date and time all the day.

```
String Format(Time time, bool seconds) {  
    if(IsNull(time)) return String();  
    String s = Format(Date(time));  
    if(time.hour == 0 && time.minute == 0 && time.second == 0)  
        return s;  
    else  
        return s + (seconds ? Format(" %02d:%02d:%02d", time.hour, time.minute, time.second)  
                        : Format(" %02d:%02d", time.hour, time.minute));  
}
```

Thank you
