I installed theIDE on two Win XP computers that both had MSVC++ 2008 and 2010 installed, worked good.

On another computer (Win7rc) the Win 7 SDK was installed with everything but the Documents and Examples.
C:\Program Files\Microsoft Visual Studio 9.0 and C:\Program Files\Microsoft SDKs\Windows\v7.0 are shown in the methods auto-setup.

A box pops up with
"Ultimate++ setup was finished."
"Press OK to launch TheIDE."

Then a pop-up
"Runtime Error!"
"Program: C\upp\theide.exe
"This application has requested the Runtime to terminate it in an unusual way."
