koldo wrote on Fri, 26 March 2010 20:01Thank you Massimo, Mirek and Zsolt

Do you know it this global serialization is available for Xmlize?

I don't think so... That's one of the reasons I use global Settings object.
BTW, I still use binary way/global serialization, but just for dialog placements/settings, I think app settings are better if centralized on a single object.

Ciao

Max
