luzr wrote on Tue, 18 April 2006 07:36Actually, maybe it is about the "click" definition. If we are speaking about moving the focus to the Ctrl, I mean moving cursor to Ctrl with focus, yes, I would believe that and I think that could be replicated in ArrayCtrl as well.

Mirek

I solved the problem by adding to my ImageOption ReFocus() WhenAction.
But I want to believe that if something is clicked it should have SetFocus() on itself. Or is this too fuzzy?
