perhaps it is a bug (U++ 1824, MSVC9).

1) Compile UWord and open the attached qtf document.

2) on the left side there is a table with a red cell. Click it and try to let it to become white using the cell property button. After done the program crash.

Luigi

I believe this is venerable bug in UWord example, fixed around rev 2000. I actually crashes after clicking on most buttons.

Please try newer revision.
