Hi Nick!

The syntax described in help is correct. The problem is with ">" because it is interpreted as a shell redirection. You need to quote it in order to pass it as an argument:

```
c:\upp\umk trunk OpenWind MSC9 -a1ev ">GUI,PRO,CLIENT_DUMB"
```

```
"d:\Probuilds\Dumb\openWind.exe"
```

Hopefully this will help I know that using ">" in this way is pretty weird, it confused me at first too. I'll add a note about this into the manual.

Honza
