Revision 2272. If there is no theide.exe, setup do not owerwrite files in destination directory, but appends. For example, Tutorial/Gui01/main.cpp:

```
#include <CtrlLib/CtrlLib.h>
```

```
using namespace Upp;
```

```
GUI_APP_MAIN {  
    PromptOK("Hello world");  
}
```

```
#include <CtrlLib/CtrlLib.h>
```

```
using namespace Upp;
```

```
GUI_APP_MAIN {  
    PromptOK("Hello world");  
}
```
