masu wrote on Wed, 19 April 2006 04:18Hi,

I'd like to check out the latest upp sources with UVS2 since it seems that the svn repository is not uptodate at any time.

My problem is that I don't know, which ftp server to set for communication.

Is there a tutorial or manual on UVS2 somewhere.

Matthias

I update svn once a week (but sometimes gap between updates is longer.. sorry)
