koldo wrote on Fri, 23 April 2010 02:24Hello all

dolik.rce and me are glad to show you new svn pages in Web

Now you can see in index page (<http://www.ultimatepp.org/index.html>) the latest svn revision and a link to svn pages that are here ([http://www.ultimatepp.org/svn\\$suppweb\\$svn\\$en-us.html](http://www.ultimatepp.org/svn$suppweb$svn$en-us.html)).

There you can access svn logs for all and major releases. There also filters for only U++, Bazaar and Web.

The first dolik.rce idea was to do a dynamic filtering. However compatibility problems forced to do html pages.

Proposals are welcome!

WONDERFUL!

Mirek
