Hello all!

I think, it will be good idea to add WhenSelected-callback to DropDownList.

My variant:

DropChoise.h

```
class DropDownList ...
```

```
...
```

```
Callback WhenSelected;
```

```
...
```

DropList.cpp

```
void DropDownList::Select() {
    int c = list.GetCursor();
    if(c >= 0)
        value = key[c];
    if(dropfocus)
        SetFocus();
    Sync();
    UpdateAction();
    WhenSelected.Execute();
}
```

Best regards,  
Anton
