fudadmin wrote on Tue, 18 April 2006 17:31I haven't tested with all the fonts but this works:
in Editor.cpp (RichEdit package) around line 580

```
/*  
ff.Add(Font::ARIAL); //comment 3lines  
ff.Add(Font::ROMAN);  
ff.Add(Font::COURIER);  
*/  
//add 2 lines below ("font enumerator")  
for(int i = 0; i < Font::GetFaceCount(); i++)  
    ff.Add(i);  
FontFaces(ff);
```

Hey that worked! Thanks for the help there.

luzr

1.? How you want to change it to Null? By changeing library code? Not a good idea...

Never mind then, I was just wondering...

Thanks for all your help guys!
