Hello all

I think it is good to have our index page (http://www.ultimatepp.org) translated to as many languages as possible. This is because it is like our cover letter, a small summary about what we are, to be linked from web.

It is very easy to translate it. You can get as a seed the translation closer to your language. For example, to translate it to italian I would begin from catalan or spanish translation. Google translator could also help.

Looking to our .t files it seems we could easily translate it to (unordered list ). If your language is not in this list I invite you to add it.

- deutsch (german)
- suomen (finnish)
- magyar (hungarian)
- italiano (italian)
- dutch
- polszczyzna (polish)

- svenska (swedish)

If you want to translate it to your language but you do not feel comfortable editing uppweb package, you can give me the translation and I can upload it for you. If you want your name will appear between the U++ translators.
