Hello Andrei

Quote:About index page, i think some links are redundant, they appear in both sections "Getting Started" and "Users". IMO Overview and Comparison should be removed from User section and remain only in Getting Started section because a user of U++ doesn't read overview and comparison every time but only first time when he start with U++.
For me it is ok.

Quote:Also pages like Web index which are marked as "To be done" should not appear unless they exists.
Really it is there for the community to give their opinion and for them to know it is going to be done. However it is not really very important. If more people think the same it can be removed. The only problem is that in that case probably it will never be done .
