Finally! I have found appropriate API

GUI_APP_MAIN

```
{  
    HelloWorld hw;  
    hw.Title("Hello world example");  
    hw.Text(Nvl(Join(CommandLine(), " "), "Hello world !"));  
    Size s = hw.GetMaxSize(); // Maximum available width (cx) and height (cy)  
    hw.SetRect(s.cx - 210, s.cy - 110, 200, 100);  
    hw.PopUp();  
    hw.Run();  
}
```
