Hello kohait00

Quote:having had a look at the API again, i was wondering why all the Vector<> stuff hasnt been packed into a struct or something to have all info combined

I agree. I did not touch it because I did not wanted to touch original andrei implementation and this is not an important issue in package development.

In fact I was thinking on other areas for radically improving speed with huge data sets.

Quote:@koldo: how far is your Plot3D stuff

Ah, it was not my intention to do it. If you have time you can do it .
