koldo wrote on Thu, 13 May 2010 05:05Hello Mirek

A very small fix and a question.

- After last changes line "const char \*fs = "  
Software\\Microsoft\\Windows\\CurrentVersion\\Explorer\\Shell Folders" in FileSel.cpp seems not  
to be necessary.

Thanks, removed.

Quote:

- I wanted to set "file" field before an ExecuteOpen() to be the by default file, but I do not know  
how as Update() function deletes it:

I believe that what you are looking for is "PreSelect".

Mirek
