luzr wrote on Fri, 28 May 2010 15:54I am sorry, but can you just add plain files (whole files, no patches) please?

Mirek, Can you change with places OCI-NLS_NCHARSET_ID_AL32UT8 and OCI-NLS_NCHARSET_ID_UT8 like this:

```
if(oci8.OCIEnvNlsCreate) {
  if((v_without_NLS)&&(oci8.OCIEnvNlsCreate(&envhp, accessmode, 0, 0, 0, 0, 0, 0,
OCI-NLS_NCHARSET_ID_AL32UT8, OCI-NLS_NCHARSET_ID_AL32UT8))){
    LLOG("OCI8: error on initialization utf8 NLS");
    v_without_NLS = true;
  }else v_without_NLS = false;
  if((v_without_NLS)&&(oci8.OCIEnvNlsCreate(&envhp, accessmode, 0, 0, 0, 0, 0, 0,
OCI-NLS_NCHARSET_ID_UT8, OCI-NLS_NCHARSET_ID_UT8))){
    LLOG("OCI8: error on initialization utf8 NLS");
    v_without_NLS = true;
  }else v_without_NLS = false;
}
```

The problem is: charset AL32UT8 is created in 9.1 database release, but UTF8 is created in 8.0. UTF8 it is not a real Unicode charset.
