This should fix it

```
int ParseForArgs(const char* sqlcmd)
{
    int numargs = 0;
    const char* ptr = sqlcmd;
    while (*ptr)
        if(*ptr == '\\')
            while(++ptr && (*ptr != '\\' || *++ptr && *ptr == '\\'))
                ;
            else if(*ptr == '-' && *(ptr+1) == '-')
                while(++ptr && *ptr != '\n' && *ptr != '\r')
                    ;
            else if(*ptr == '/' && *(ptr+1) == '*')
            {
                ptr++;
                while(++ptr && (*ptr != '*' || (*(ptr+1) && *(ptr+1) != '/'))
                    ;
            }
            else if(*ptr++ == '?')
                ++numargs;
    return numargs;
}
```
