This should fix it

```
int ParseForArgs(const char* sqlcmd)
{
    int numargs = 0;
    const char* ptr = sqlcmd;
    while (*ptr)
        if(*ptr == '\\')
            while(*++ptr && (*ptr != '\\' || *++ptr && *ptr == '\\'))
                ;
        else if(*ptr == '-' && *(ptr+1) == '-')
            while(*++ptr && *ptr != '\n' && *ptr != '\r')
                ;
        else if(*ptr == '/' && *(ptr+1) == '*')
        {
            ptr++;
            while(*++ptr && (*ptr != '*' || (*(ptr+1) && *(ptr+1) != '/)))
                ;
        }
        else if(*ptr++ == '?')
            ++numargs;
    return numargs;
}
```
