Subject: Re: Copy GridCtrl cell when read only
Posted by ktj9 on Wed, 02 Jun 2010 02:36:13 GMT

Emm... I need this pretty soon. I might be wrong, but it seems GridCtrl::colidx and GridCtrl::rowidx are set to the cell on LeftDown. Anyway, I don't see out-of-box copy-paste utilities. So I would imagine we need to subclass and override GridCtrl::Key, or wire a menu callback, or override GridCtrl::RightDown, or all of them.
