hi folks,

i stumbled over inconsistant use of style stuff inside some upp Ctrls, names EditCtrl, Calender, Clock, ButtonOption..

they should not have stuff like

Paint:

```
const Style &st = style ? *style : StyleDefault();
```

but should instead properly do what other Ctrl's do

ctor:

```
style = &StyleDefault();
```

```
//Paint and elsewhere
```

```
style->line...
```

this prevents things from breaking up when editing global style information (over StyleDefault)..

i attached a rar file with .svn inside to easy compare what i mean.

PS: neither should Font be part of Style or should it.. i havent found any other that Calender Ctrl to be the case... because SetFont should be used instead, right?

RFC
