Hello Mirek

There is a problem with FileSel, at least choosing a file for reading.

It contains a DropList called type.

To add a new type it is used:

type.Add(type.GetCount(), name);

However if a name with wildcards is included as file name, it is called this:

type.Add(fn, t_("Custom file type (") + fn + ')');

After choosing the file, the program gets an exception here:

int ti = ~type;

As type contains an String, it cannot be assigned to an int.
