Hello Mirek

There is a problem with FileSel, at least choosing a file for reading.

It contains a DropList called type.

To add a new type it is used:

```
type.Add(type.GetCount(), name);
```

However if a name with wildcards is included as file name, it is called this:

```
type.Add(fn, t_("Custom file type (" + fn + ')');
```

After choosing the file, the program gets an exception here:

```
int ti = ~type;
```

As type contains an String, it cannot be assigned to an int.
