Mirek

Mirek, When I set label text the control did not refresh.

The code need to change from:

```
ToolButton& ToolButton::Label(const char *text, int _kind)
{
    if(kind != _kind) {
        kind = _kind;
        ==>>REMOVE Refresh();
    }
    Text(text);
    return *this;
}
to
```

```
ToolButton& ToolButton::Label(const char *text, int _kind)
{
    if(kind != _kind) {
        kind = _kind;
    }
    Text(text);
    ==>>ADD Refresh();
    return *this;
}
```

The flat file is provided!

Thank you.

Ion Lupascu (tojocky)
