Subject: Is there a function to remove leading white space?
Posted by forlano on Sun, 23 Apr 2006 14:01:00 GMT

I have a string and I want to remove all white spaces at its beginning.
I believed .Shrink() could be useful to do it but doesn't seem so. I played even with Filter and
FilterWhile with no success. Of course I can prepare my own function but maybe there is
already... and well hided.
