Hello All,

I propose to add new future in docking visualization process like in Visual Studio. I like this realization and seems to be more intuitive!

The process like this:

- 1. On margins of the main window paints the dock icon options (seems to be in the image package)
- 2. In the middle of the window where mouse over paint all the docking options and tabbing.
- 3. When mouse over to a docking/tabbing option do not resize the controls but only paint the transparent blue window.

The image is attached:

Thank you, Ion Lupascu (tojocky)
