
Subject: Docking - Strange behaviour with GLCtrl
Posted by [mdelfede](#) on Sat, 17 Jul 2010 10:43:39 GMT

Using Docking to manage GLCtrl derivated controls gives a strange behaviour : floating windows are ok, docked right and bottom windows are ok too, but top- and left-docked windows not, the bar goes right but the content goes on opposite side.
Here an image to show that :

I'll attach the sample Upp package used to test it on next post.

Ciao

Max
