There is a mistake in definition of DayName definition (DyName too)

Original:

```
String DayName(int i, int lang)
```

```
{
    static char *day[] = {
        tt_("date\Saturday"),
        tt_("date\Monday"),
        tt_("date\Tuesday"),
        tt_("date\Wednesday"),
        tt_("date\Thursday"),
        tt_("date\Friday"),
        tt_("date\Sunday")
    };

    return i >= 0 && i < 7 ? Nvl(GetLngString(lang, day[i]), GetENUS(day[i])) : String();
}
```

New:

```
...
static char *day[] = {
    tt_("date\Sunday"),
    tt_("date\Monday"),
    tt_("date\Tuesday"),
    tt_("date\Wednesday"),
    tt_("date\Thursday"),
    tt_("date\Friday"),
    tt_("date\Saturday")
};
...
```
