New find-replace dialogs: The original Find/Replace dialog was non-standard and admittedly had a few things that could be improved. However, once you got used to it it was BETTER than the standard way of splitting up the dialogs.

I have now bound Replace to CTRL+F so I never even use the 'Find' dialog but I'm still missing the old 'Replace ALL' option. I don't want to have to select the whole file in order to replace all instances.

+1. I also preferred the old dialog. It was a way better for me.
