Subject: Re: is there U++ coding style reference?
Posted by kohait00 on Tue, 27 Jul 2010 11:07:09 GMT

this is quite a few infos, is good to concentrate them. thanks.
in fact, the coding style from u++ can already be felt somehow and i liked it as well and tried to adopt it naturally ASAP.

especially the 'no new/delete' aspect and 'everything belong to somewhere' is great.

here comes some more stuff i tried to sum up what i learned and didnt want to forget. a class structure design. maybe this can help as well.
