Subject: How to make complex indexes?
Posted by jeremy_c on Thu, 05 Aug 2010 10:25:02 GMT

Well, I guess they are not really complex, but one more than just an INDEX attribute on a field, for example:

sqlite> CREATE INDEX qsos_dup_idx ON qsos(callsign, qso_date, mode_id, band_tx_id);

Thanks,

Jeremy
