I got it. The left and right indexes are 1 based, not zero based it seems

```
needs.AddColumn("Need", 3).HeaderAlignCenter().AlignLeft();    // 1
needs.AddColumn("Band",  1).HeaderAlignCenter().AlignCenter(); // 2
needs.AddColumn("BandL", 1).HeaderAlignCenter().AlignCenter(); // 3
needs.AddColumn("BandE", 1).HeaderAlignCenter().AlignCenter(); // 4
needs.AddColumn("BandQ", 1).HeaderAlignCenter().AlignCenter(); // 5
needs.AddColumn("Mode",  1).HeaderAlignCenter().AlignCenter(); // 6
needs.AddColumn("ModeL", 1).HeaderAlignCenter().AlignCenter(); // 7
needs.AddColumn("ModeE", 1).HeaderAlignCenter().AlignCenter(); // 8
needs.AddColumn("ModeQ", 1).HeaderAlignCenter().AlignCenter(); // 9
needs.AddRow("","P", "L", "E", "Q", "P", "L", "E", "Q");
needs.SetFixedRows(2);
needs.JoinFixedCells(1, 0, 1, 1);
needs.JoinFixedCells(2, 0, 5, 0);
needs.JoinFixedCells(6, 0, 9, 0);
needs.ColorCols();
```

Thanks for the great control!

Jeremy
