Never mind, I figured it out. I can only use Evaluate to eval the first statement it seems?

```
Scan(global,
  "main() {\n"
  "  p = Person();\n"
  "  p.SetName(\"John\");\n"
  "  Exclamation(p.GetName());\n"
  "}");
Upp::Execute(global, "main");
```

caused my "Person" example to work.
