Subject: Re: String w/high characters but not UTF?
Posted by jeremy_c on Tue, 10 Aug 2010 12:29:41 GMT

When I parse the data. I create a small U++ app that shows what my problem is:

```
#include <Core/Core.h>

using namespace Upp;

CONSOLE_APP_MAIN
{
  char data[] = { 65, 65, 65, 181, 65, 65, 65, 182, 65, 65, 183 };
  String d(data);
  for (int i=0; i < d.GetCount(); i++) {
    LOG(FormatInt(i) + "=" + FormatInt(d[i]));
  }
}
```

Thanks for any help with this. I'm sure it's simple but it's driving me nuts!

Jeremy
