Subject: TabCtrl (or equivalen) with tabs on left side
Posted by forlano on Wed, 11 Aug 2010 13:26:03 GMT

Hello,

I have little space in vertical direction, so if the tabs are on the left side would be OK. But it seems not supported by the standard Ctrl.
Is there something useful in Bazaar? I had a look at it but with too many "Tabs" around I was a bit confused and I do not know which is stable and supported. Any suggestion?

Thank you,
Luigi
