forlano wrote on Wed, 11 August 2010 15:26Hello,

I have little space in vertical direction, so if the tabs are on the left side would be OK. But it seems not supported by the standard Ctrl.

Is there something useful in Bazaar? I had a look at it but with too many "Tabs" around I was a bit confused and I do not know which is stable and supported. Any suggestion?

Thank you,
Luigi
Hi Luigi,

The TabBar from mrjt should be able to do that. At least according to the picture in this thread
