Hello all

It is included in Controls4U a new Knob control. You can see samples in the picture.

The interface is preliminar. If you have any advice please tell me asap.

It includes:

- 4 color types: SimpleWhiteType, SimpleBlackType, WhiteType (preliminar), BlackType (preliminar)

- 2 marks: Line and Circle

Angle begin, angle end, min value, max value, step value are programmable.

In addition it is possible to set numbers in marks (SetNumber) and add the possibility of knob locks in marks (SetInterlocking).

The status is:

- Visual style: 70%
- Class methods: 90%
- User input: 95%
- .usc layout designer: 20%
- Documentation: 0%
