another proposal, maybe this one's better...

```
const byte * Peek(int size = 1) { if(size <= 0) return NULL; if(ptr + size <= rdlim) return ptr; return  
NULL; }  
byte * Head(int size = 1) { if(size <= 0) return NULL; if(ptr + size <= wrlim) return ptr; return  
NULL; }
```
